PROJECTS

Creative Studio Rentals Website

- Designed and developed a web application in a group for renting creative spaces using HTML, CSS, and JavaScript.
- Implemented validation and local storage to manage user-submitted listings

To-Do List Application

- Developed a to-do list app in a group for keeping track of tasks added by the user in a local database using C# and Windows Forms.

Flight Management System

- Programmed and developed a flight management system that provides the user a booking system to book a given flight from a local database using C# and Windows Forms.

E-Commerce Website (Ongoing)

- This is an ongoing capstone project of our group from Bow Valley College, designing and developing an e-commerce website for a client
- Using Next.js, Stripe, MySQL, and Vercel for the development and publishing of this project.

OBJECTIVE

Motivated Software Developer student at Bow Valley College with a passion for building efficient, scalable applications. Strong foundation in programming, problem-solving, and software development principles. Seeking opportunities to apply technical skills and gain hands-on experience in software development.
